5.15 LOCAL SWITCHING SERVICE

Local Switching provides for the use of end office switching equipment. Included in Local Switching Are:

Common Switching, which provides the local end office switching functions and optional features.

Transport Termination which provides for the trunk side arrangements which terminate the Local transport Facilities. The number of Transport Terminations provided, will be determined by the Company.

Where end offices are appropriately equipped, international dialing may be provided. International dialing provides the capability of switching international calls with service prefix and address codes having more digits than are capable of being switched through a standard equipped end office.

SECTION 5 - SUPPLEMENTAL SERVICES (cont'd)

5.16 LOCAL TRANSPORT SERVICE

The Local transport rate category provides the transmission facilities between the Customer premises and the end office switch(es) where the Customer traffic is switched to originate or terminate its communications.

Local Transport is a two-way voice frequency transmission path composed of facilities determined by the company. The two-way voice frequency path permits the transport of calls in the originating direction (from the End User end office switch to the Customer's premises) and in the terminating direction (from the Customer premises to the end office switch), but not simultaneously. The voice frequency transmission path may be comprised of any form or configuration of plant capable of and typically used in the telecommunications industry for the transmission of voice and associated telephone signals within frequency bandwidth of approximately 300 to 3000 Hz.

The Company will work cooperatively with the Customer in determining (1) whether the service is to be directly routed to an end office switch, and (2) the directionality of service.

(1) Transmission paths

The Number of Transport transmission paths provided is based on the Customer's order and is determined by the Company.

(2) Interconnection

Interconnection of non-company switched access transport facilities is available between an end office and a Customer point of presence where such facilities are provided.

SECTION 5 - SUPPLEMENTAL SERVICES (cont'd)**5.17 NUMBER PORTABILITY SERVICE****5.17.1 General**

Number Portability allows an End User who switches from the Company's local exchange service to that of another certified local exchange carrier to retain the use of their existing Company assigned telephone number, provided the Customer remains at the same location.

Number Portability utilizes a telephone number and electronic switching facilities to automatically forward all incoming calls to the Company assigned telephone number to the terminating telephone number assigned by another certified local exchange carrier.

All other access, local, and toll rates and charges for all services ordered by the Customer, as set forth in other sections of this Tariff and the Company's local exchange and federal access tariff's, continue to apply.

5.17.2 Regulations

- (a) Number Portability is offered where facilities permit.
- (b) The Customer is required to provide sufficient terminating facilities and service at the terminating end of a forwarded call to adequately handle all traffic to that location and is solely responsible to ensure that its facilities, equipment, and services do not interfere with or impair any facility, equipment, or service of the Company, or any of its end users.
- (c) End to end transmission characteristics may vary depending on the distance and routing necessary to complete calls over facilities and the fact that another carrier is involved in the provisioning of service.

5.18 LOCAL EXCHANGE MEASURED RATE SERVICES

A telephone service with local service charges. Zone usage measurements as defined by Illinois Bell and GTE North in their service territories apply and are incorporated by reference.

5.18.1 Regulations

- (i). A rate for an individual line service access line does not include a telephone set with the line.
- (ii). The length of conversation to which usage rates apply is determined by the time of day, day of the week, and class of service.
- (iii). Service will be provided outside base rate area and within exchange area, at the rates identified in Schedule F.
- (iv). Customers may transport analog data basic telephone lines. The Utility will support low speed analog transmission of data (Up to 4800 bps) over regular access lines.

5.18.2 Monthly Rate

Minimum	\$ 5.00
Maximum	\$ 12.00

The Company will not impose installation charges for its measures rate services.

SECTION 5 - SUPPLEMENTAL SERVICES (cont'd)

5.19 PRIVATE BRANCH EXCHANGE TRUNK LINE SERVICE

Flat rate and measured rate PBX trunk lines are provided from the Utility central office in connection with Business and Residence Manual PBX Service and Dial PBX service.

Trunk line service is furnished with customer-provided multiline terminating systems for similar purposes and connected to such service under the provisions of said schedule.

5.19.1 Regulations

(a). PBX Trunk Lines

Rates apply to flat rate trunk lines and measured rate trunk lines furnished in connection with business and residence manual and Dial PBX service, and to such trunk line service furnished with customer-provided multiline terminating systems used for similar purposes and connected to such service.

(b). Verification and/or Interruption of Busy Line Condition

Verification of a busy line condition and/or interruption of a conversation in progress at the calling party's request will be provided.

(c). Two measured rate PBX Trunk Line service types are available: Assured PBX Trunk Line service and Basic PBX Trunk Line service.

(i) Assured PBX Trunk Line service transmission loss will not exceed 5.5 db as referenced to 0.0 dBm signal source (1 milliwatt at 1000 Hertz and 900 ohms impedance).

(ii) Basic PBX Trunk Line service transmission loss will not exceed 8.0 db as referenced to 0.0 dBm signal source (1 milliwatt at 1000 Hertz and 900 ohms impedance).

SECTION 5 - SUPPLEMENTAL SERVICES (cont'd)**5.20 PREMIUM EXCHANGE SERVICE (cont'd)****5.20.2 Integrated Service Digital Network**

Integrated Service Digital Network - ISDN-BRI is a local exchange telecommunications service that provides an integrated voice/data communications capability for the transmission of circuit switched voice, circuit switched data and packet switched data on an incoming and outgoing basis. The B channels are used for voice or circuit switched data up to 64 Kbps. The D channel is used to carry signaling information for the B channels plus packet switched data. The service is available from specially equipped digital switching equipment located in the Utility's central offices.

Circuit Switched Voice provides the ability to originate and receive switched voice calls over a 64 Kbps channel.

Circuit Switched Data provides the ability to originate and receive circuit switched data calls over a 64 Kbps channel. Data line speeds up to 64 Kbps are permitted.

ISDN-BRI provides a Business or Residence customer with the ability to integrate current voice and data channel services utilizing Individual Line Measured Rate Business Service or Individual Line Measured/Flat Rate Residence Service.

(a) Regulations

- (i) ISDN-BRI will only be provided where central office facilities and operating conditions permit.
- (ii) ISDN-BRI is furnished to customers at the rates and charges as shown in Schedule H, which are in addition to other rates and charges for Individual Line Measured Rate Business service or Individual Line Measured Rate Residence Service.
- (iii) Rates and Charges for other optional features are in addition to those for ISDN-BRI service and are provided only where facilities and operating conditions permit.

(b) ISDN-BRI Basic Service

Provides two B channels, each of which can support Circuit Switched Voice and/or Circuit Switched Data and one D channel which is used for signaling and/or Packet Switched Data.

ISDN or Home ISDN customer may select any combination of features included in the ISDN-BRI Basic Service. The central office features provided are as follows:

(i) Voice Features

Provides a Primary Directory Number for each B channel voice service.

Multiple Directory Numbers

Allows multiple call appearances of Primary, Secondary and/or Shared Directory Numbers to be assigned to stations equipped with compatible premises equipment.

Call Information Display

Displays call related information about any call appearance that has an active call associated with it. The information that can be displayed includes called or calling directory number within the ISDN-BRI system, incoming call identifier call type, call progress information and call forwarding information. This information is limited to being within the serving central office switch and between B1 and B2 channels.

Time and Date Display

Displays time and date in those offices that are suitably equipped.

Data Features

Primary Directory Numbers

Provides a Primary Directory Number for each B channel with circuit switched data service. Multiple Directory Number call appearance is not allowed with data service.

Call Information Display

Displays call related information about any call appearance that has an active call associated with it. The data that can be displayed includes called or calling directory number within the ISDN-BRI system, incoming call identifier call type, call progress information and call forwarding information. This information is limited to being within the same serving central office switch and between B1 and B2 channels.

(c) ISDN-BRI Optional Packet Data Device

(i) Packet Data Features

- D-Chanel Packet Access

Provides access to the Basic D-channel that supports X.25 data up to 16 Kbps

- D Channel Packet Device

Allows a packet device to be attached to the D channel. Additional D channel packet devices are available at the rates and charges as set forth in Schedule H.

- Logical Channels

Allows a ISDN-BRI subscriber to specify up to 4 logical channels for packet services, additional logical channels are available at the rates and charges as set forth in Schedule H.

- Fast Select Initiate/Accept

Allows a sending data terminal to forward up to 128 bytes of data along with call setup and clearing packets. Fast Select acceptance allows the switch to transmit incoming call packets with the fast select facility to a destination terminal that has this feature.

- Flow Control Parameter Negotiation

Allows negotiation on a per call basis of the flow control parameters. This consists of automatically negotiating the maximum packet size and window size for each direction of data transmission.

(d) ISDN-BRI Individual Optional Features

Additional B Channel Circuit Switched Primary Directory Numbers (Passive Bus/ B-Channel Contention)

Allows multiple Primary Directory Numbers on a single Basic Rate Interface (BRI) where central office facilities and operating conditions permit. A maximum of eight (8) physical Primary Directory Numbers are allowed on a BRI. Installed Primary Directory Numbers will contend for the use of the B channels. Under these conditions, the customers assume responsibility for any blocked calls. The Utility will input a set of unique parameters for each logical or physical customer premises equipment that will utilize the channel.

(e) ISDN Individual Optional Features

(i) Secondary Directory Number

Allows a unique number other than the primary directory number to be assigned to the station equipped with compatible premises equipment.

(ii) Hold, Consultation Hold, Three Way Conference, and Call Transfer

Allows the station user to place an existing call on hold, access another call appearance and establish a second call. When this second connection is made, the station user can privately confer with the third party (Consultation Hold). The held party can then be joined to create a Three Way Conference. Finally, the station user can disconnect from the call, connecting the original call to the third party (Call Transfer). The Call Transfer can connect two parties that are outside the ISDN system. The ISDN customer will be billed the applicable local, ZUM and toll message charges for the transferred call.

(iii) Packets - Additional Logical Channels

Provides additional logical channels for B or D channel packet devices. D channel packet terminals may be equipped with Additional Logical Channels, specifying a quantity between five (5) and fifteen (15) (the first four (4) logical channels are included with each D channel packet device associated with the ISDN-BRI Optional Packet Data Device). B channel packet terminals may be equipped with Additional Logical Channels, specifying the quantity between (16) and one hundred (100) (the first fifteen are included with the B Channel Packet Service). To change the quantity of Additional Logical Channels, the Miscellaneous Change Charge as set forth in Schedule F is applicable.

(iv) B Channel Packet Service

Permits the assignment of a dedicated B channel for the exclusive use of transporting packet data. One or both B channels of a ISDN line can be assigned to this service. Once assigned, a B channel cannot be used for any other service unless changed at the Rates and Charges as set forth in Schedule H.

(v) Packet - Permanent Virtual Circuit

Allows packet switching to be implemented over a dedicated logical channel without needing call set-up or clearing both ends of the ISDN. Permanent Virtual Circuit must reside within the same serving central office. This feature is established by the customer service order.

(vi) Packet Hunting

Allows the customer to define a group of numbers that belong to a hunt group. When an incoming call is destined for a busy terminal in the group, the call will be directed to an idle terminal in the same hunt group.

(vii) Shared Call Appearances

Allows call appearances of a Primary or Secondary Directory Number from another station on the same ISDN-BRI Business ISDN line to be assigned to stations equipped with compatible premises equipment. A Shared Directory Number is only available between B1 and B2 channels on the same line in those offices that are suitably equipped.

5.21.1 Integrated Services Digital Network (ISDN)

- (a) Primary Rate Interface (PRI) Service: PRI provides the capability to:
 - 1. Transport customer information in the form of circuit-switched voice or data up to 64 kbps over any B channel.
 - 2. Allow B channels to be allocated for specific services, such as Direct Inward Dialing (DID), Direct Outward Dialing (DOD), and Toll Free Service, or optionally configure channels to access multiple services on a per-call basis. All of the preceding services may be accessed on a Call-by-Call Service Selection basis.
 - 3. Allow the user to have access to the directory number of the calling party.
- (b) Conditions: This service is offered subject to the following conditions:
 - 1. PRI is only available from serving central offices equipped with the necessary facilities to provide PRI service. Feature availability and service capabilities are dependent on the facilities and digital technology providing the service.
 - 2. ISDN compatible terminal equipment is required for operation. It is the customer's responsibility to power and obtain such equipment.
 - 3. PRI service does not preclude customer from originating or receiving circuit-switched voice calls from inside or outside either their serving central office or their Local Exchange Area. Where facilities are available, customers will be able to originate and receive circuit-switched data calls outside of their serving central office.

Section 7 - BUSINESS NETWORK SWITCHED SERVICES

7.1 GENERAL

Business Network Switched Service provide a business customer with a connection to the Company's switching network which enables the customer to:

- a) receive calls from other stations on the public switched telephone network;
- b) access the Company's local calling service;
- c) access the Company's operators and business office for service related assistance; access toll-free telecommunications service such as 800 NPA; and access 911 service for emergency calling; and
- d) access the service of providers of interexchange service. A customer may presubscribe to such provider's service to originate calls on a direct dialed basis or to receive 800 service from such provider, or may access a provider on an ad hoc basis by dialing the provider's Carrier Identification Code (10XXX).

Business Network Switched Service is provided via one or more channels terminated at the customer's premises. Each Business Network Switched Service channel corresponds to one or more analog, voice-grade telephonic communications channels that can be used to place or receive one call at a time.

Connection charges as described in Section 2 apply to all service on a one-time basis unless waived pursuant to this Tariff.
